

HORSCH *PremiumCare*: Manage your maintenance costs with a fixed price servicing and warranty package.

HORSCH has announced three new schemes to provide customers with additional confidence and support when purchasing a Leeb self-propelled sprayer.

Two schemes, PremiumCare and PremiumWarranty, are ideal for sprayer owners wishing to control their maintenance costs, helping to improve their business cashflow. Available on the latest Leeb 6.300 PT and 8.300 PT, these schemes ensure high machine productivity thanks to regular servicing and maintenance by HORSCH trained technicians while retaining the sprayer's value through the use of original parts.

HORSCH PremiumCare

PremiumCare provides fixed-price dealer servicing on the latest Leeb 6.300 PT and 8.300 PT self-propelled sprayers. Purchase on its own or with PremiumWarranty.

HORSCH PremiumWarranty

PremiumWarranty that covers all service parts against breakdown for up to five years. You can add PremiumWarranty to your PremiumCare scheme.

HORSCH PremiumUsed: Buy a used Leeb sprayer confident it has been serviced to our original factory standards.

HORSCH PremiumUsed

Our PremiumUsed checklist has more than 200 points specified by our sprayer development engineers to cover all critical and wearing elements.

The checks, completed by your HORSCH-trained dealer technicians, ensure that used Leeb PT270 and PT280 self-propelled sprayers still meet the original rigorous performance and reliability benchmarks.

Once completed, you can be confident that the used sprayer has been serviced and returned to original factory standards.

Leeb PT 280 self-propelled sprayer

The 8000 litre Leeb PT 280 uses a mechanical axis drive for great traction and features close nozzle spacing, pneumatic nozzle control and an advanced cleaning system.

The award-winning BoomControl Pro system holds the boom rock-steady, even over undulating terrain, allowing the boom to be positioned close to the crop for maximum crop penetration.
