BODY TIPPER
BIGBODY & PROBODY

Our BigBody and ProBody body tippers offer high transport volumes with optimum stability and are considered all-rounders in agriculture. The tailgate is grain proof, closes hydraulically as standard and maintains constant contact pressure thanks to the locking hook. Our BigBody models are considered market leaders in the industry, are weight-optimised and made of high-quality steel. A wide range of additional equipment is available for our body tipper series.

PUSH-OFF TRAILER
RAMBODY

Our RamBody series push-off trailers are innovative horizontal unloaders for agriculture. Robust, durable and with a sophisticated chassis, they offer maximum driving comfort. With a pushing function and versatile application options, they are the ideal solution for efficient transport in agriculture. The push blade with a large grid viewing window gives the driver a clear view of the load at all times. The load can be compacted by moving the push blade with the tailgate closed. An integrated pressure safety device protects the tailgate.

SILAGE WAGON
RADIUM

With the Radium, we are expanding our product range with a powerful series of silage wagons. The models fill the gap between the BigBody and the RamBody. Krampe has specifically developed the Radium further: the robust chassis with proven Krampe technology ensures high driving stability, safety and comfort, while the construction impresses with fast unloading times and a well-thought-out operating concept.

THREE-WAY TIPPER
FLEXBODY

Our FlexBody series offers maximum quality combined with high cost-effectiveness. Thanks to its modular construction, side walls, bridges and chassis can be freely combined. For example, the side walls can be mounted using sliding connections, which makes it much easier to replace individual components. Another plus: the consistent standardisation of our assemblies ensures that spare parts are quickly available. This means that the FlexBody is not only flexible in use, but also offers decisive advantages in terms of service and equipment.

EARTHMOVING TIPPER SK

WITH FLAT FLOOR – SAND AND GRAVEL

Our SK series sand and gravel tippers are versatile all-round vehicles with a conical body and flat floor sheet. Optional add-on extensions can be added to increase the volume for transporting various bulk materials. The SK series is based on the successful BigBody series, but has been specially optimised for earthworks.
