THE LEMKEN SOLITAIR 9+ PNEUMATIC SEED DRILL – VERSATILE FOR UNIVERSAL APPLICATIONS

New for
2020

Contact **HAMBLYS** for all
your **LEMKEN** requirements

The **Solitair 9+** offers farmers a range of tailor-made solutions, with working widths between three and twelve metres, mounted rigid and folding versions and even a semi-mounted folding range. The Solitair 9+ can be used in a wide range of conditions either in stand-alone operation or in combination with soil cultivation implements.

- New hopper design and solitronic control of major seeding functions
- Combine with compact disc harrows, cultivators, power harrows & drills
- Quickly demounted from one cultivator and moved to another
- Precise seed distribution; seed distributors directly above the coulter bar

The **Zirkon 12** is a decisive update of a perennial favourite from LEMKEN. It's the well thought-out details that offer critical advantages, including a modular design with a large range of available transmissions and tines. Each machine can be optimally adapted to the specific needs of your farm.

- Single-piece trough of special high-quality steel for smooth running
- DUAL-Shift transmission for easy change of the direction of rotation
- Bolted or quick-change tines for short set-up times
- Versatile range of rollers for any working conditions

BLUE MEANS FREEDOM THE ZIRKON 12 POWER HARROW – PROVEN QUALITY

Working depth can be
adjusted mechanically
or hydraulically directly
from the tractor seat
