AUTUMN 2023

CHARITY COMBINE CHALLENGE 2023

The team at Morris Corfield were delighted to present a cheque for £2,500 at Cheshire Ploughing Match, following the successful sale of t-shirts commemorating the 2023 Charity Combine Challenge. In June, a team of four drove a CLAAS LEXION 8700 from John O Groats to Lands End in aid of Mind mental health charity and Children with Cancer UK.

Comprising of Morris Corfields' James Baldini, Olly Harrison, John Branson, and Martin Williams, the team has so far raised a staggering £93,000. Thank you to every one who kindly donated to the worthy cause.

CLAAS

Vintage harvest
success in Shropshire

A unique spectacle appeared across the Shropshire countryside this harvest; a sixty year old CLAAS combine, sold new by Morris Corfield in 1962 working alongside its modern counterpart

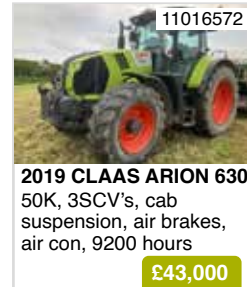

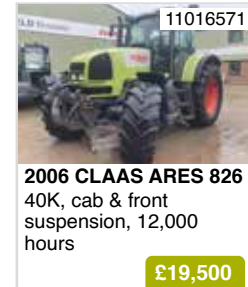

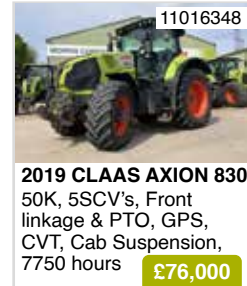

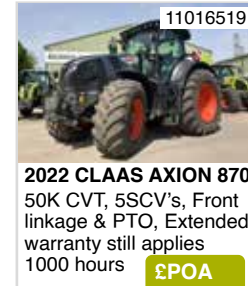

The SF, which was the first self propelled combine Morris Corfield sold has come a long way since it's launch in the 1950's, and is thought to be one of very few working examples in the country. Shadowed by the Claas Lexion 8700TT which is the latest machine in a 60 year working relationship with the original owners, the Forester Family of Willey Park (now Barrow Farms).

John Corfield, sold the classic combine to Lord Forester in 1962, and in 1965 it was sold on to John Rowson of Home Farm Cleobury North, then on to George Green in Burwarton before it completed it's Shropshire tour and we bought it back in 1989. The original log book is still residing in Managing Director Norman Duppa's office.

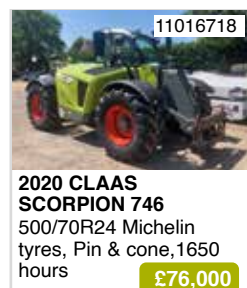

Norman commented "we wanted to celebrate the SF combine's 60th Anniversary in style, she has been stored in a shed since 1989, last making an appearance at our open day in 2013. After a quick wash down, it's Ford engine fired up first time." He continued "it required some minor remedial work to get it working in the field including a cutter bar and header guard refurb and some replacement belts but this was easily completed thanks to the vast spare parts held at our depot."

Morris Corfield stock over 19,500 CLAAS parts lines ranging from vintage machinery to the very latest harvesting technology.

The special scene kick starts an exciting series of events and plans in 2024 across the companies' four depots to celebrate the firm's 65 year anniversary as CLAAS dealer; one that very few other local machinery dealerships can boast.

Spread, shred or chop at the touch of a button

Long been known for its strength and reliability, the 2023 winter housing season will see the new Teagle Tomahawk 8200 which has been redesigned from the ground up, and now available from MORRIS CORFIELD.

Retaining all the strength of the 7100 and 8100 models, the new 8200 line from Teagle includes two models: 8200 for feeding and bedding, available either mounted or trailed, and the 8250 for precision straw processing, also either mounted or trailed.

The 'SYNCHRO' control system in both variants offers the operator:

- Pause - Stop the flow of material at the touch of a button.
- Resume - Bale restraint returns to previous position. Machine remembers the previous position before the pause
- Automated Mode 1 - High output. Output is optimised, depending on application and material type. Typically used for bedding loose housing.

- Automated Mode 2 - Reduced output. Output is reduced, depending on application and material type. Typically used for short chop precision processing.
- Manual control - Total operator flexibility. Control the speed of processing, bale restraint position and conveyor independently.

All are managed through the tried and tested paired WiFi control desk that has been updated to include the new functions and reconfigured to improve operator comfort.

The 8200 now benefits from the largest diameter cross beater on the market to ensure smooth delivery of processed materials. Material then passes through an updated fan and swivel chute with improved material flow and blow distance. Hardox® is now included as standard in the chute components.

Give us a call to see the 8200 for yourself.
