CEMIS 1200

CLAAS GPS PILOT - CEMIS 1200

The latest software release for the new GPS steering system from CLAAS is packed full of exciting new features, such as...

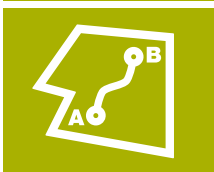

WORKING POSITION COVERAGE TRIGGER

The counter setting in CEBIS (e.g. hydraulic spool) is carried across to the CEMIS 1200 display to activate and deactivate the coverage map.

TRAMLIN INDICATORS

Tramlines are highlighted in a different colour, making them instantly recognisable. There is also the option to activate an acoustic signal for entering or leaving a tramline.

AUTOMATIC CREATION OF REFERENCE LINES

Reference lines are automatically created for each edge of a recorded or imported boundary.

OPERATOR PROFILES

Drivers can store their individual settings and terminal configurations in their own profile.

TRAILERS YOU CAN TRUST

For over fifty years, **Richard Western** has made trailers trusted by farmers and contractors across the UK and beyond. From flatbeds to monocoques and dumpers to livestock trailers, we're proud to have played a part in the simple yet vital process of carting, carrying, hauling, and shifting the inputs and outputs of agriculture.

Of course, the company's product offering doesn't stop there. Richard Western high-output rear-discharge manure spreaders and side-discharge tanker types are highly-rated for robustness and accuracy, while our grain chasers and drill fillers help maximise the output of the machines they're paired with. In short, whatever farms need to move from A to B, Richard Western has the solution.

To produce 500 trailers and muck spreaders each year requires not only 2,500 tonnes of steel and 27,000 litres of paint, but also considerable investment in training and technology to produce the trailer and spreader designs to match today's bigger harvesters, faster tractors and higher demands.

Richard Western never stops responding to the evolving needs of its customers, resulting in the frequent introduction of new product developments that make the businesses of its customers easier, simpler, more

efficient and more productive, and at LAMMA 2024 our introductions included our latest Suffolk trailer upgrades and a new MP18 heavy-duty trailer.

If you want to find out more about why Richard Western products are a match for anything else on the market, with distinctive design features that will help boost your business, **talk to your CLAAS WESTERN dealer today.**

ABBEY
MACHINERY

Since 1947

Abbey Machinery Range

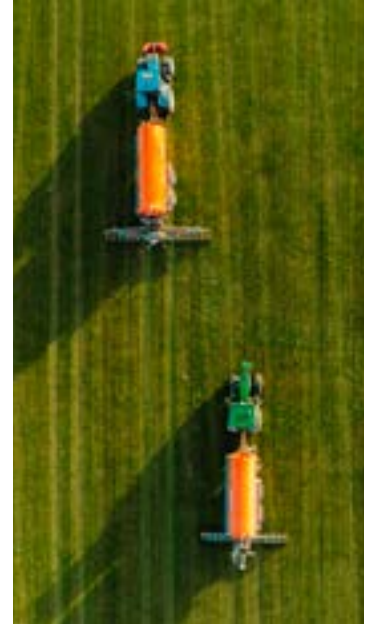

Abbey Machinery is a leading manufacturer of agricultural machinery, specializing in feeding, slurry handling and grassland management equipment for over 75 years.

Abbey is committed to manufacturing high-quality agricultural machinery to support customers in precision farming while reducing our carbon footprint and increasing sustainability.

Learn more about the complete range of products offered by Abbey Machinery at www.abbeymachinery.com

Abbey Premium Slurry Tankers

- 5,000 to 27,000 litres with larger models available
- Standard, Recess, Tandem, Recess Tandem to Tridem axle models
- Produced using full length chassis construction, anti-movement internal baffles, steel barrels, premium Battioni Pagani pumps, heavy duty axles and a patented double trap system
- SMART tanker technology options including NIR sensor and ISOBUS solutions

Abbey Low Emission Slurry Spreading Applicators

- Trailing Shoe, Band Spreaders, Shallow Disc Injectors and Cereal Applicators range
- Deliver the slurry onto the soil to harness fertiliser value, shorten rotation length, minimise crop contamination and reduce smell
- Reduce carbon emissions by up to 60%
- Variety of widths available

Abbey Diet Feeder Range

- 8 to 35+ cubic metre capacity with option for larger feeders
- Single, twin and tri-auger options
- Unique low auger profiles, that gently chop and mix feeds
- TMR technology & NIR technology, Feed and Weighing App with Bluetooth capability

Avatar SD with smaller working widths

The Avatar SD is available in 8m, 9m and 10m working widths with the choice of a 6300 litre double hopper or a 6400 litre triple tank, and the ability to mount a 400 litre MiniDrill too. In 2024, the Avatar 12.25 SD and 12.40 SD can be optioned with a selective hosing. This allows the seed coulters to be supplied alternately with two different crops.

Thanks to the individual depth control, fine seeds can be placed shallowly and coarse seeds can be placed deeply. In addition, the double row spacing can be achieved so that cereals can be sown with a spacing of 25cm and soybeans, for example, with 50cm. The Avatar 12.50 SD offers a row spacing of 50cm as an option for the 12m version. Row cleaners are available on the 8m to 12m Avatar models with 25cm row spacing.

Sprinter SL & SC

Sprinter 6.25 SL and 12.25 SC tine seed drills

Changing climate conditions are bringing about longer dry periods and cultivation methods need to change as well to meet the challenge of keeping water in the soil.

The new Sprinter models reduce tillage to a minimum yet work well in high amounts of straw residues and in harder soils. To ensure a perfect seed-soil contact between grain and seed furrow, the new Sprinters are equipped with a tine seed coulter that creates a residue-free seed furrow. Three different tine coulters (WideEdge, ThinEdge and UltraThinEdge) enable operators to additionally react to various conditions.

The new 6m SL mounted model works in combination with a Partner FT front tank while the 12m trailed SC model is equipped with a 6300 litre double hopper and available with a triple tank and additional MiniDrill options. Both feature tines with a 25cm spacing and a 180kg release force.

The Leeb CS Sprayer

The Leeb CS sprayer mounts to the tractor's 3-point linkage to form a compact and manoeuvrable unit that is ideal for smaller fields. It features many large sprayer innovations including the **award-winning BoomControl system**, an advanced boom design that keeps the boom rock steady and as close to the crop as possible and it is a unique feature in this class.

Available with 1400, 1800 and 2200 litre tank capacities, the Leeb CS has an optimised centre of gravity for controlled and confident machine handling. Continuous cleaning system CCS Pro, the induction tank and the 25cm nozzle layout are available for the new Leeb CS. An additional front tank is now available, further expanding the sprayer's flexibility.

“Market leading finance offers tailored to meet your needs and cashflow”

FINANCE

CLAAS Financial Services Ltd offer specialist agricultural finance solutions to fund your new or used machinery.

To find out more, call Simon Pharoah, your Regional Finance Manager on 07770 641817 or email him on Simon.pharoah@claasfinance.com

Our team of agricultural experts work in partnership with CLAAS dealers to provide you a finance package that suits your cash flow. Whether you wish to own the equipment or simply rent it via a lease, we have a funding solution for you. Every finance package is tailored to your requirements, from the payment frequency and deposit amount to the duration of the agreement.
