CLAAS celebrate 500,000 combines

From its first trailed combine manufactured in 1936, CLAAS has led the way in the development of the combine harvester. This year sees CLAAS celebrating half a million machines manufactured, during which time CLAAS combines have reached all corners of the world and set new standards for harvesting efficiency.

From the first MTB combine launched in 1936, followed by the SUPER in 1946, many combine names have become famous around the world and created the foundations of today's world leading machines. With over 60,000 manufactured before production ceased in 1978, the SUPER and the SUPER AUTOMATIC provided CLAAS with its first worldwide success.

1953 saw the arrival of the HERCULES, later renamed SF.

The 1960's saw the arrival of both the MATADOR GIGANT in 1961, which set new standards with a cutting bar width of up to 6.0 m, in addition to other industry-defining milestones such as SENATOR, COMET, COSMOS, CORSAR, MERCATOR, PROTECTOR and COMPACT. It was also in 1961 that CLAAS celebrated its first production milestone of 100,000 machines built.

In 1972, the launch of the DOMINATOR opened a new era that has lasted for more than 50 years and is still in production for the far east market.

Agritechnica 1995 saw the launch of a complete new range that was to prove to be a game changer in terms of performance, comfort and groundbreaking electronic applications for the emerging precision farming era. The LEXION 480, with its groundbreaking APS hybrid technology was the highlight of the trade fair and set completely new standards for output and cost efficiency.

Since then developments have included both mechanical innovations such the ground-protecting TERRA TRAC chassis technology in 1997 - also available for the TRION since 2021 - but also advances in the area of machine intelligence, especially since 2013. With CEMOS, CLAAS has since become a leader in the field of combine harvester automation and CEMOS continues to be continuously developed and expanded to include additional processes and units in combine harvesters and attachments.

The latest members of the CLAAS combine harvester family are the TRION and EVION series presented in 2021 and 2023.

Together with the LEXION, of which more than 75,000 have now been manufactured, they offer a unique range of products and equipment from the 205 hp five-walker to the 790 hp flagship LEXION 8900 TERRA TRAC with APS SYNFLOW HYBRID.

All three series enable a further increase in threshing efficiency thanks to the DYNAMIC POWER engine management system and expanded CEMOS functions. Depending on the requirements profile, an enormous range of cutting units are available - from the conventional auger cutting unit to ultra-modern, automated VARIO cutting units through to the CONVIO FLEX Draper with a flexible knife bar and flip-over reel control.

MORE THAN A MACHINE: THE CLAAS PRINCIPLE

From the first combine harvester in 1936 until today, key to the success of CLAAS combines has been the comprehensive support provided to customers. When purchasing a combine harvester from CLAAS, customers expect maximum performance and productivity through leading technology and optimal support.

With a user-friendly operating concept, groundbreaking driver assistance and close networking with the CLAAS service partner, not only is maximum harvesting performance achieved, but also a unique lifetime performance of every CLAAS combine harvester. It is thanks to this future viability that CLAAS combine harvesters have always remained in use for a very long time - in some cases for more than five decades. Due to extremely low annual losses in value, all CLAAS combine harvester series and models are very popular, even when used.

These characteristics are united in all CLAAS combine harvesters and have been so for 500,000 success stories. It is this experience from almost 90 years of combine harvester production that makes "Made by CLAAS" a promise.

ANNIVERSARY MACHINES

As is traditional with CLAAS, this summer will see a number of anniversary machines on display at shows and events, bearing a special 500,000 paint job and decals. In addition, all 2025 machines will carry a sticker recognising the anniversary and the fact that a CLAAS combines is 'More than a machine'.

Further information on both current and historic CLAAS combines can be found on the CLAAS website www.claas.co.uk

Are you pushing and pulling your limits?

Are your tractors faster & more powerful?

Are your trailers larger & heavier?

Do you want to ensure your vehicles are safe, roadworthy & fit-for-purpose?

Do you want the job done thoroughly & professionally?

The Agricultural Tractor Trailer Scheme provides the answer

The Agricultural Tractor Trailer Scheme (ATTS), enables trained dealers to provide a valuable service to their customers, including documented vehicle inspection and brake performance testing, in a single package. This gives the customer confidence that a machine will satisfy statutory requirements, or the test will highlight any vehicle issues which need to be addressed.

There are legal requirements for owners and operators to ensure vehicles are;

- Maintained in a safe and roadworthy condition,
- Satisfy statutory construction and performance requirements,
- Don't endanger the safety of other road users and,
- Don't exceed statutory speed or weight limits.

**Book your
test with
CLAAS WESTERN
today**

For more information on this essential tractor-trailer safety scheme, go to <https://bagma.com/training/agricultural-tractor-trailer-scheme/> or scan the QR code.

WINSTON'S WISH **WW**

Giving hope to grieving children

Each year a different business unit are able to choose the Charity of the Year for the Company to support for that coming year. This year was the turn of CLAAS Western.

Each CLAAS Western location put a charity forward and the charity chosen for this year is Winston's Wish.

Winston's Wish is a charity that helps children, teenagers and young adults up to the age of 25, find their feet when their worlds are turned upside down by grief. Last year they supported 62,484 grieving children and young people, and 90% of their income comes from their supporters.

Every day across the UK, children and young people lose someone significant to them.

The death of someone important can be the most traumatic experience a child or young person will ever face.

Winston's Wish relies on voluntary charitable donations to support children and their families following the death of a parent, sibling or important person.

Since 1992, they have helped tens of thousands of bereaved children and young people and, with your help, can help tens of thousands more during the most difficult time of their lives.
