

- Impact and precision with 5 000 l or 6 000 l polyethylene mixture tanks
- Very powerful, hydraulic all-wheel drive with automatic slip regulation system for the versions OptiGear and PowerGear
- All-wheel steering
- Optimal weight distribution 50:50 front:rear in working position
- 50 km/h on the road at 1 500 engine revolutions
- Tyres up to \varnothing 2.19 m possible
- Variable track adjustment from 1.80 m to 2.40 m
- Up to 1.30 m clearance
- Quiet, comfortable cabin with Cat. IV filtration system
- Centrifugal pump made of stainless steel with an output of 1 000 l/min
- You can choose between 5- or 7-sect. booms
- CCS or CCS Pro water system with powerful rotary pump (1 000 l/min), continuous inside cleaning and other automatic washing programs
- 3" fittings suction-side
- Little drift due to automatic boom control system BoomControl and consistent target area height even at high operational speeds
- 25 cm nozzle layout for optimum wetting
- Powerful induction hopper
- Can be optimally adapted to the requirements of the farm due to its high versatility
- Compatible with different steering systems
