

Helping you make the most of your digital solutions.

DIGITAL CARE.

The right support for your digital solutions.

As agriculture becomes progressively digitalised, the opportunities to run your business more efficiently are ever increasing. Steering systems, automatic documentation or machine optimisation, for example.

Our specialists are on hand to help you make the most of your machines and digital solutions – so that you can take full advantage of these opportunities. You can choose from a range of DIGITAL CARE services designed to provide optimum support for your CLAAS solution. We answer all your questions, leaving you free to concentrate on what matters.

Your digital solutions.

CLAAS connect

Connects people, machines and systems.

Farm connect

Keep track of everything: manage your master data and document your work.

CEMOS

Optimises the settings of CLAAS machines instantly and continuously during fieldwork.

Fleet connect

Easy, automatic field-level documentation.

Field connect

Use geodata to create application maps and reference tracks.

GPS PILOT CEMIS 1200

Steers the CLAAS machine, assists with implement control and facilitates task management.
